AWS MARKETPLACE CHANNEL PARTNERS

Last updated: 6/30/2026

The following is a list of AWS Marketplace Partners designed to help you identify partners who are registered and authorized to resell software through AWS Marketplace Channel Partner Private Offers (CPPO). Partners are grouped based on their validated experience selling in AWS Marketplace.

Active and Launched Sellers are registered and authorized to resell software through AWS Marketplace Channel Partner Private Offers (CPPO). Launched sellers have completed onboarding (i.e. updated public profile, Banking and Tax information), and have received at least one ISV resell authorization.

Are you looking for Professional Services? Some Channel Partners provide professional services related to the software they resell. You can discover software related professional service listings by searching for specific Channel Partners on AWS Marketplace.

For partner details and locations access the partner on the AWS Partner Finder

Exportable list available here

Active and Enrolled Sellers
